## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 3, 4 and 6-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a motivation for the method step of establishing a set of optimal operation initial set points based on a quantity of polymer used, a normal air lift rate, and an expected inflow and outflow turbidity in combination with the other method steps in claim 1. The prior art also fails to disclose using an air flow rate monitor and controller receiving a control signal directing a rate of air flow to a lift pump to maintain a target ratio range between a size of solids inventory and a size of sand bed within the system of claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference to Hughes (4,342,649) discloses an upflow reactor filter assembly.
